TRAINING EXPERIENCE

Delivered Corporate trainings for below clients

- Suttati Group (Sumax Enterprises Pvt. Ltd.)
- Mahindra
- Premium Transmission Ltd.
- ElringKlinger Automotive Components India Ltd.
- Banco Products India Ltd.
- Kranti Industries Pvt. Ltd.
- Rieter India Pvt. Ltd.
- Indo Schottle Auto Parts Pvt. Ltd.
- Tenneco
- John Deere
- Bharat Forge
- Konecranes
- CIE Automotive
- ARaymond

PROFESSIONAL SUMMARY

Manufacturing and automotive quality professional **with 19+ years of industry experience** as an **Independent Freelance Corporate Trainer** and **QMS/IMS Consultant**. Specializes in **Quality Management Systems (QMS), Integrated Management Systems (IMS), IATF 16949, Automotive Core Tools, Supplier Quality Management, Lean Manufacturing, Six Sigma, Problem-Solving and Continual Improvement.**

Experienced in delivering practical, industry-oriented corporate training and supporting organizations with QMS implementation from scratch, IATF 16949 readiness, internal and supplier audits, customer audit preparation, PPAP, corrective action, root cause analysis and process improvement. Skilled in translating international standards and technical concepts into practical shop-floor applications through case studies, audit simulations, group exercises and manufacturing-based examples. Focuses on improving product quality, process capability, supplier performance, audit compliance, customer satisfaction and operational efficiency.

TECHNICAL SKILLS

Quality Management Systems (QMS)

- ISO 9001 requirements, awareness, implementation and maintenance
- QMS documentation, procedures, work instructions and documented information
- Process approach, risk-based thinking and process interaction
- Gap assessment, implementation planning and continual improvement
- Nonconformity management and corrective and preventive action
- Internal audit planning, execution, reporting and follow-up
- Audit evidence, compliance assessment and closure of findings
- Quality objectives, KPIs, process monitoring and performance evaluation
- Management reviews and QMS effectiveness
- QMS implementation and coordination from scratch

Integrated Management Systems (IMS)

- ISO 9001 Quality Management System
- ISO 14001 Environmental Management System
- ISO 45001 Occupational Health and Safety Management System
- ISO 50001 Energy Management System awareness
- IMS integration, implementation and internal auditing
- Environmental aspects and impacts assessment
- Occupational health and safety hazard identification
- Risk assessment and compliance obligations
- Operational controls, emergency preparedness and continual improvement
- Hazard Identification and Risk Assessment (HIRA)

- Environmental, health, safety and energy management awareness

Automotive Quality Management – IATF 16949

- IATF 16949 requirements, interpretation and implementation
- IATF 16949 implementation and coordination from scratch
- Automotive QMS documentation and compliance
- Customer-Specific Requirements (CSR)
- Process approach and risk-based thinking
- Manufacturing process audits and audit readiness
- Change management and configuration control
- Product safety and quality-related process controls
- Supplier quality management and development
- Customer complaint handling and corrective action
- Continual improvement and defect prevention
- Automotive quality performance monitoring

Automotive Core Tools

- Advanced Product Quality Planning (APQP)
- Production Part Approval Process (PPAP)
- Failure Mode and Effects Analysis (FMEA)
- Design FMEA (DFMEA)
- Process FMEA (PFMEA)
- Measurement System Analysis (MSA)
- Statistical Process Control (SPC)
- Control Plan development and implementation
- Process capability analysis (Cp/Cpk)
- Core Tools integration and application
- Product and process risk assessment
- Quality planning, validation and production launch readiness

Internal Auditing and Audit Management

- Internal Auditor training and competency development
- Audit principles, terminology and methodology
- Audit programme preparation and scheduling
- Audit scope, criteria, planning and checklist development
- Process-based and risk-based auditing
- QMS, IMS and IATF 16949 internal audits
- Supplier QMS and manufacturing process audits
- Customer audit preparation and coordination
- Objective evidence collection and verification
- Audit findings, nonconformities and reporting
- Root cause identification and corrective action verification
- Corrective action effectiveness checks and audit closure
- Layered Process Audit (LPA) awareness
- Audit readiness and prevention of recurring nonconformities

Problem-Solving and Corrective Action

- 8D and Global 8D (G8D) problem-solving methodology
- Root Cause Analysis (RCA)
- Why-Why analysis and 5 Whys
- Fishbone and cause-and-effect diagrams
- Problem definition, containment and corrective action
- Root cause validation and evidence-based analysis
- Corrective and preventive action planning
- Effectiveness verification and recurrence prevention
- Customer complaint investigation and resolution
- Defect analysis and cross-functional problem-solving
- Quality Circles and structured improvement activities

Lean Manufacturing and Operational Excellence

- Lean Manufacturing principles
- Lean Six Sigma Green Belt and Black Belt concepts
- Kaizen and continuous improvement
- Value Stream Mapping (VSM)
- Waste identification and elimination
- Poka-Yoke and mistake-proofing
- 7 QC Tools and statistical quality techniques
- Rejection and rework reduction
- First-Time-Through (FTT) improvement
- Cost of Poor Quality (COPQ) reduction
- Process stability and productivity improvement
- Process optimization and standardization
- Kaizen project planning and implementation
- Quality improvement project monitoring

Supplier Quality and Vendor Development

- Supplier quality management and performance monitoring
- Supplier audit planning and execution
- Supplier QMS and process gap assessment
- Supplier development and capability improvement
- PPAP submission, review and approval support
- Supplier corrective action requests and follow-up
- Supplier nonconformity management
- Vendor evaluation and quality performance assessment
- Supplier risk assessment and improvement planning
- Supplier process compliance and audit readiness
- Coordination between purchasing, production and quality teams

Customer Quality Management

- Customer-Specific Requirements (CSR) and compliance
- Customer complaint management and resolution
- Customer audit planning and preparation
- Customer PPM monitoring and reduction
- Corrective action reporting and closure
- Customer quality performance and satisfaction
- Cross-functional coordination for quality issues
- Customer communication and escalation management
- Zero-defect initiatives and critical OEM programme support
- Evidence-based response to customer concerns

Shop-Floor and Manufacturing Quality

- Quality at source and defect prevention
- In-process inspection and final inspection
- Process controls and inspection standards
- Traceability and product identification
- Standard operating procedures and standard work
- Defect containment and escalation
- Operator awareness and quality ownership
- Layered process audits and workplace compliance
- Process monitoring and production quality controls
- Rejection, scrap and rework analysis
- Manufacturing process improvement and problem-solving

Technical and Product Quality

- Geometric Dimensioning and Tolerancing (GD&T)
- Metrology and measurement techniques
- Coordinate Measuring Machine (CMM) awareness
- Gauge calibration and measurement equipment control

- Product testing and validation
- Noise, Vibration and Harshness (NVH) fundamentals
- Design for Manufacturing (DFM)
- Design for Assembly (DFA)
- Value Analysis and Value Engineering (VA/VE)
- Computer-Aided Design (CAD) and Computer-Aided Engineering (CAE) overview
- Casting simulation and Finite Element Analysis (FEA) overview
- Product and process validation
- Engineering quality and inspection practices

Environmental, Health, Safety and Energy

- ISO 14001 environmental management awareness
- ISO 45001 occupational health and safety awareness
- ISO 50001 energy management awareness
- Hazard Identification and Risk Assessment (HIRA)
- Environmental aspects and impacts
- Occupational hazards and risk controls
- Compliance obligations and operational controls
- Workplace safety awareness and continual improvement

Leadership, Employee Engagement and Training

- Corporate training and technical knowledge transfer
- Training needs assessment and programme customization
- Competency development and skill enhancement
- Quality awareness for operators and technicians
- Supervisor and team-leader development
- Communication and customer handling
- Job Instruction and workplace learning
- Quality Circles and employee idea generation
- Cross-functional teamwork and coordination

- Interactive workshops, case studies and group exercises
- Training effectiveness and practical application assessment

EDUCATION

- Bachelor of Technology (B.Tech.) – Mechanical Engineering
- Diploma – Mechanical Engineering
- Executive Post Graduate Diploma in Management (EPGDM) – Symbiosis

CERTIFICATION AND PROFESSIONAL DEVELOPMENT

- Lead Auditor – ISO 9001:2026, as stated in the supplied profile
- IATF 16949 Internal Auditor
- Integrated Management Systems (IMS) Internal Auditor – ISO 9001, ISO 14001 and ISO 45001
- Lean Six Sigma Green Belt – ASCB, UK
- Lean Six Sigma Black Belt – ASCB, UK
- Global 8D / Problem Solving – OMNEX IMS
- Global Product Support & Quality Planning Workshop – Winterthur, Switzerland
- Engine Sealing & Specialty Technology Workshop – Dettingen, Germany

PROFESSIONAL EXPERIENCE

Independent Freelance Corporate Trainer / QMS & IMS Consultant

- Deliver corporate training in QMS, IMS, IATF 16949, Automotive Core Tools, supplier quality, problem-solving, Lean Manufacturing and operational excellence.
- Support QMS implementation, documentation, gap assessment, deployment, internal auditing and continual improvement.
- Assist organizations with IATF 16949 implementation, readiness assessment, audit preparation and compliance improvement.
- Conduct internal, supplier and process audit support activities, including checklist development, evidence assessment, reporting and corrective action follow-up.
- Provide practical guidance on APQP, PPAP, FMEA, SPC, MSA, Control Plans, process capability and automotive quality requirements.
- Facilitate 8D/G8D problem-solving, root cause analysis, customer complaint resolution and corrective action effectiveness reviews.

- Support supplier development, supplier quality improvement, vendor audits and PPAP-related activities.
- Help organizations improve rejection, rework, customer PPM, COPQ, process stability and manufacturing quality performance.
- Customize training content to organizational requirements, participant competency and operational challenges.

Previous Professional Experience – Quality Assurance, QMS, IMS and Manufacturing

- Quality Assurance and Quality Management System coordination.
- Integrated Management System coordination and compliance management.
- Supplier and vendor quality management.
- Customer quality, customer complaints and corrective action.
- Internal, supplier and customer audit management.
- Automotive quality planning, PPAP and process quality control.
- Technical documentation, procedures and work instructions.
- Manufacturing process optimization and continual improvement.
- Team management, employee competency development and cross-functional coordination.
- Quality performance monitoring, process capability and defect reduction initiatives.

PROJECT DETAILS AND KEY ACHIEVEMENTS

- Supported QMS and IATF 16949 implementation, including gap assessment, documentation, system deployment and audit readiness.
- Reported achievement of approximately 50 PPM and 99% first-time-through performance, with zero customer disruption in a quality improvement context.
- Contributed to approximately 50% reduction in rejection and rework.
- Supported approximately 50% reduction in Cost of Poor Quality (COPQ).
- Achieved approximately 30% reduction in CMM inspection cycle time.
- Supported approximately 38% reduction in customer PPM and reported zero PPM in critical OEM programmes.
- Completed more than 50 Kaizen projects, as reported in the source profile.
- Reported 100% rework elimination in a critical improvement project.

- Supported the implementation and strengthening of FMEA, SPC, MSA and Layered Process Audits.
- Contributed to audit preparedness and reported zero major nonconformities in relevant audit contexts.
- Supported zero-defect Start of Production (SOP) launch activities.
- Supported supplier audits, corrective action, customer audit preparation and supplier performance improvement.

TRAINING ENGAGEMENTS

Independent Freelance Corporate Trainer specializing in automotive and manufacturing quality, with experience delivering more than 200 training sessions/programmes for Tier 1 and Tier 2 organizations, as reported in the supplied profile. Has also reported training more than 50 employees of new companies or newly established organizations.

Training Methodology

- Instructor-led classroom training and corporate workshops.
- Practical, industry-oriented sessions using automotive and manufacturing examples.
- Interactive case studies, group exercises and audit simulations.
- Hands-on application of quality tools, root cause analysis and corrective action.
- Customized training aligned with customer requirements and organizational objectives.
- Practical interpretation of ISO and IATF requirements.
- Training for operators, technicians, quality inspectors, engineers, supervisors, internal auditors, process owners and managers.

Training Areas

- Quality Management Systems (QMS) and ISO 9001
- Integrated Management Systems (IMS)
- IATF 16949 implementation and awareness
- Internal Auditor Development and Audit Management
- Automotive Core Tools: APQP, PPAP, FMEA, MSA, SPC and Control Plans
- Lean Manufacturing, Kaizen and Operational Excellence
- Lean Six Sigma, 7 QC Tools and 8D Problem-Solving
- Root Cause Analysis and Corrective Action

- GD&T, Metrology, CMM and Gauge Calibration
- Design Quality: DFMEA, DFM/DFA, VA/VE, CAD/CAE and FEA overview
- Product Testing, Validation and NVH Fundamentals
- Environmental, Occupational Health, Safety and Energy Management
- Hazard Identification and Risk Assessment (HIRA)
- Supplier Quality Management and Vendor Development
- Customer Quality, Customer Complaints and Audit Readiness
- Quality Circles and Employee Engagement
- Communication, Customer Handling, Supervisor Development and Job Instruction

Training Client Organizations

Delivered corporate training in Quality Management Systems (QMS), Integrated Management Systems (IMS), IATF 16949, Automotive Core Tools, Supplier Quality, Problem-Solving, Lean Manufacturing and Quality Improvement for professionals from the following organizations:

- Suttati Group (Sumax Enterprises Pvt. Ltd.)
- Premium Transmission Ltd.
- ElringKlinger Automotive Components India Ltd.
- Banco Products India Ltd.
- Kranti Industries Pvt. Ltd.
- Rieter India Pvt. Ltd.
- Indo Schottle Auto Parts Pvt. Ltd.
- Tenneco
- John Deere
- Bharat Forge
- Mahindra
- Konecranes
- CIE Automotive
- ARaymond
