NEXAOURAA

CONSULTANCY

BUSINESS EXCELLENCE • QMS & IATF • SUPPLIER QUALITY • MANUFACTURING EXCELLENCE

Transforming Quality.

Elevating Operations.

Driving Business Excellence.

EXPERIENCE
30+ Years Industrial

SUPPLIER SERVICES
200+ Projects Completed

SUPPLIERS SUPPORTED - New-Age Tier-1
50+ Organizations

OUTCOME: robust systems • stable processes • improved productivity • stronger customer confidence

ABOUT NEXAOURAA

BUSINESS EXCELLENCE • OPERATIONAL EXCELLENCE • QUALITY TRANSFORMATION

Nexaouraa Consultancy is an implementation-focused Business & Operational Excellence partner for manufacturing and process-industry organizations.

We combine Business Excellence, QMS / IATF, TQM, TPM, Lean, Plant Operations, Manufacturing Excellence and Certification Support to convert business needs into practical shop-floor execution and measurable improvement.

BUSINESS & OPERATIONAL EXCELLENCE

- Business performance, customer focus, KPI / SQDCPM, strategy-to-execution and continual improvement.
- Gemba-based improvement, productivity, OEE, capacity, cost, delivery, Lean, TPM and TQM.

QUALITY & CERTIFICATION

QMS / IATF implementation, ISO systems, audit readiness, NC closure and ZED certification support.

PEOPLE & CAPABILITY

Practical training, internal auditor development, problem solving, standardization and ownership culture.

ASSESS → DESIGN → IMPLEMENT → IMPROVE → AUDIT & SUSTAIN → BUSINESS IMPACT

Why Nexaouraa

MORE THAN DOCUMENTATION - Operational Excellence Through QMS

We help organizations build, implement, sustain and improve quality systems that work on the shop floor.

1 Leadership-Backed Industry Experience

Automotive & auto components
- Engineering & heavy manufacturing
- Press shop
- Machine shop
- Assembly & fabrication
- CNC/VMC & precision machining
- Grinding
- Plastics & rubber
- Welding & fabrication
- Battery manufacturing
- Pharma
- Plating
- Supplier / customer quality

2 Operational Excellence & Implementation Focus

QMS & IATF 16949 implementation from gap assessment through shop-floor deployment, performance improvement and audit readiness.

3 Customer + Supplier Quality

Audit readiness, supplier audits, PPAP, complaints, 8D/CAPA and customer requirements.

4 Measurable Improvement

Focus on PPM, FTR, COPQ, rejection, rework and process stability.

OUR PHILOSOPHY

"A quality system should work on the shop floor — not just in the audit file."

Core Consulting Services

1 Operational Excellence, QMS & Plant Operations

Integrated QMS, IMS and Operational Excellence implementation focused on plant operations, PPC, process control, shop-floor discipline, productivity, quality, cost and delivery.

2 IATF 16949 Implementation

Gap assessment, system development, deployment, training and audit readiness.

3 Supplier Quality & Audits

Risk-based supplier audits, QMS/process assessment, corrective action and supplier development.

4 Customer Audit Readiness

Customer audits, certification support, recertification preparation and compliance.

5 PPAP & Quality Planning

PPAP preparation/review/audits, APQP, FMEA, Control Plan, SPC, MSA and capability.

6 Quality Improvement

8D/G8D, root cause, Lean Six Sigma, Kaizen, Poka-Yoke, COPQ and PPM improvement.

7 Training & Capability

QMS awareness, internal audit, quality tools, problem solving and continual improvement.

8 Plant Operations & Manufacturing Excellence

PPC, OEE, TPM, Lean, Kaizen, 5S, manpower, capacity and shop-floor improvement.

TPM • TQM • Lean • Six Sigma • Kaizen • 5S • OEE • Productivity • Cost • Delivery • Safety

AUTOMOTIVE OEM & CUSTOMER-SPECIFIC REQUIREMENTS

Hands-on experience in interpreting OEM requirements and translating them into practical QMS controls, documentation, shop-floor implementation, and audit readiness.

OEM / Customer group	Relevant system / requirement
MSIL – Maruti Suzuki	VSA / VQM — Vendor System Audit / Vendor Quality Manual
Honda	GQI — Global Quality Improvement System
General Motors	BIQS — Built-In Quality Supply
Ford	Manufacturing System Assessment (MSA)
Volkswagen Group	VDA 6.3 — Process Audit
Renault–Nissan	ANQNP — Alliance New Product Quality Procedure
Mahindra & Mahindra	Mahindra Standards / Quality System Audit
Tata Motors	WCM / applicable Tata Quality Management System requirements
Volvo Group	KATA / Volvo Production System requirements

IMPLEMENTATION APPROACH

- Identify applicable OEM-specific requirements and customer-specific requirements (CSRs).
- Assess gaps in QMS documentation, product realization, and shop-floor controls.
- Translate requirements into procedures, formats, responsibilities, and objective evidence.
- Train process owners and implement controls at the workplace.
- Verify effectiveness through process audits, data review, and corrective action.

"Practical, implementation-focused experience in OEM-specific quality systems, customer-specific requirements, supplier quality, new product launch readiness, process audits, and continuous improvement across automotive manufacturing environments.

NEXAQURAA CONSULTANCY

Building Quality. Improving Performance. Driving Business Excellence.

Automotive OEM Standards & Customer-Specific Requirements

Hand-on experience in handling customer requirements and implementation.

MARUTI SUZUKI | HONDA | GENERAL MOTORS | Ford | Volkswagen | RENAULT NISSAN | Mahindra | TATA MOTORS | VOLVO

OEM / Customer group	Relevant system / requirement
Maruti Suzuki	VSA / VQM – Vendor System Audit / Vendor Quality Manual
Honda	GQI – Global Quality Improvement System
General Motors	BIQS – Built-In Quality Supply
Ford	Manufacturing System Assessment (MSA)
Volkswagen Group	VDA 6.3 – Process Audit
Renault–Nissan	ANQNP – Alliance New Product Quality Procedure
Mahindra & Mahindra	Mahindra Standards / Quality System Audit
Tata Motors	WCM / applicable Tata Quality Management System requirements
Volvo Group	KATA / Volvo Production System requirements

Helping Automotive Suppliers Meet OEM Quality Expectations

Our Implementation Approach

01 Identify applicable requirements
Identify OEM-specific standards, customer-specific requirements and applicable supplier expectations.

02 Assess implementation gaps
Evaluate QMS documentation, product realization, process controls and shop-floor practices.

03 Implement practical controls
Translate requirements into procedures, work instructions, APQP/PPAP, PFMEA, Control Plans and objective evidence as applicable.

04 Develop process owners
Train Quality, Production, Engineering and other relevant teams to implement and maintain the required controls.

05 Verify effectiveness
Conduct process audits, review implementation evidence, address nonconformities and verify corrective-action effectiveness.

From OEM Requirements

FROM GAP ASSESSMENT TO AUDIT READINESS

Audit readiness

What We Support

System development • deployment • internal audit • corrective action • audit preparation

Typical Core Tools

APQP • PPAP • FMEA • Control Plan • SPC • MSA • Process Capability

Outcome

A practical, implemented management system with stronger process control and audit readiness.

CONNECTING CUSTOMER EXPECTATIONS WITH SHOP-FLOOR EXECUTION

S SUPPLIER QUALITY & AUDITS

Risk-based audit planning and execution

On-site and remote QMS/process audits

Traceability & process-control assessment

Nonconformity identification & closure

Supplier guidance, PPAP and quality training

Supplier development & performance improvement

C CUSTOMER QUALITY & AUDIT READINESS

Customer complaint handling

Root-cause analysis & corrective action

8D / CAPA support

Customer-specific requirements

Customer quality reviews & audits

Certification and recertification preparation

Rejection, Scrap & Customer Return Analysis

QUALITY LOOP

Requirement → Control → Verify → Correct → Prevent → Improve

TYPICAL DELIVERABLES :

CSR compliance matrix • Audit plan and checklist • Process audit findings • QMS procedures and formats • APQP / PPAP files • PFMEA / Control Plan review • Training records • Corrective action tracker • KPI dashboard • Readiness and implementation plan

Diverse Industry Footprint

Quality assurance • Process control • Dimensional control • Inspection • Process stability

Precision Machining

Dimensional control, process stability and inspection

Gear Manufacturing

Hobbing, grinding and process quality

Sheet Metal & Fabrication

Stamping, laser cutting and fabrication controls

Casting & Assembly

Process controls, traceability and quality assurance

Injection / Compression Moulding

Process consistency and defect prevention

Heat Treatment / Plating

Surface treatment and process control

Painting & Finishing

Surface quality and process compliance

Multi-axis / Forging / Heavy Engineering

Quality assurance across complex manufacturing environments

TPM & TQM Excellence

SYSTEMATIC IMPROVEMENT FROM EQUIPMENT RELIABILITY TO CUSTOMER SATISFACTION

TOTAL PRODUCTIVE MAINTENANCE (TPM)

- AM / PM / CBM framework and maintenance maturity assessment
- OEE improvement: Availability • Performance • Quality
- Autonomous Maintenance and operator ownership
- Planned / Preventive / Predictive Maintenance
- Breakdown, MTBF / MTTR and chronic-loss elimination
- Focused Improvement / Kaizen and loss-tree analysis
- Spare parts, lubrication, maintenance standards and visual controls
- Safety, early equipment management and zero-loss culture

TOTAL QUALITY MANAGEMENT (TQM)

- Customer focus and CTQ deployment
- Quality at source and process ownership
- QMS culture, quality awareness and layered audits
- Supplier quality and incoming quality assurance
- Poka-Yoke, SPC, process capability and defect prevention
- RCA, 8D, CAPA and recurrence prevention
- COPQ, PPM and FTR improvement
- Continual improvement and management review

LEAN & BUSINESS EXCELLENCE

- Value Stream Mapping and waste elimination
- 5S / Visual Management / Standard Work
- Line balancing and cycle-time reduction
- Manpower optimization and productivity
- Pull / Kanban / flow improvement where applicable
- SQDCPM performance management
- KPI dashboards and daily management
- Sustainability through audits and ownership

Industry & Sector Coverage

ADAPTABLE SYSTEMS, OPERATIONS AND QUALITY IMPROVEMENT FOR DIVERSE INDUSTRIES

Automotive & Mobility

- OEM / Tier-1 / Tier-2 / Components
- Machining, forging, casting, assembly, plastics

Engineering & Heavy Industry

- Precision engineering, fabrication, transmission
- Capital equipment, pumps, valves, industrial products

Oil, Gas, Energy & Process

- Oil & gas / petrochemical support operations
- Energy, utilities, process safety and asset reliability

Food, Beverage & Sugar

- Food processing, dairy, beverage and sugar plants
- Hygiene, traceability, process control and food-safety systems

Pharma, Chemical & Life Sciences

- Process control, documentation and GMP-aligned systems
- Chemical, formulation and regulated manufacturing environments

Electrical, Electronics & Consumer

- Electrical/electronics manufacturing and assembly
- Supplier quality, process control and reliability

Sector-specific scope is defined according to applicable statutory, regulatory, customer and certification requirements.

Certification, QMS & Compliance Support

Quality & Automotive

- ISO 9001
- IATF 16949
- Customer-specific requirements / CSR
- APQP • PPAP • FMEA • SPC • MSA

Environment, Safety & Energy

- ISO 14001
- ISO 45001
- ISO 50001
- Legal / compliance evaluation and EMS/OHSMS deployment

Food & Process Safety

- ISO 22000
- FSSC 22000
- HACCP-based systems
- Traceability, hygiene, CCP / process controls

ZED CERTIFICATION SUPPORT

- ZED Assessment & Auditing *(Bronze, Silver, Gold, Platinum levels)*
- Zero Defect Manufacturing (*Quality management, defect reduction)*
- Zero Effect Framework *(Environmental sustainability, waste management)*
- Process Optimization *(Lean manufacturing, 5S, Kaizen)*
- Regulatory & Statutory Compliance
- MSME Capacity Building & Training

Information & Business Systems

- ISO/IEC 27001 – Information security
- Integrated Management System (IMS)
- Document control, risk, KPI and internal audit systems
- Business continuity / process resilience support where applicable

Certification Lifecycle

- Gap assessment & implementation roadmap
- Manuals, procedures, SOP / WI, forms and records
- Internal auditor training & internal audits
- Pre-assessment / certification audit readiness
- NC / CAR closure and effectiveness verification
- Surveillance, recertification and continual improvement

Integrated Compliance & Expert

Services : EXTENDING QUALITY SYSTEMS INTO PEOPLE, STATUTORY COMPLIANCE & AUDITOR CAPABILITY

HR & Statutory Compliance

- Support for manufacturing and other eligible establishments, based on applicable requirements.
- Provident Fund (PF), ESIC, Professional Tax and Labour Welfare Fund
- Payroll processing, salary administration, statutory dues and employee queries
- Factory licensing, renewals, records and inspection coordination
- Contract labour registration, licensing and statutory registers
- Minimum wages, bonus, gratuity and periodic statutory returns
- MPCB consent coordination and related compliance documentation

Management Systems & Auditing

- Expertise available across implementation, auditing and capability-building activities.
- ISO 9001:2015 Quality Management System
- ISO 14001:2015 Environmental Management System
- ISO 45001:2018 Occupational Health & Safety Management System
- IATF 16949:2016 automotive QMS and customer audit readiness
- AS9100D awareness / internal auditor training and system support
- Internal audits, implementation support, corrective action and training

Training & Capability Development

- QMS / EMS / OHSMS awareness and internal auditor training
- ISO 9001, IATF 16949 and AS9100D requirements training
- Practical audit preparation, nonconformity response and documentation
- Role-based learning aligned to the organization's scope and needs

How This Complements Nexaouraa

- Connects quality systems with people processes and statutory obligations
- Combines shop-floor improvement with management-system discipline
- Supports clients with coordinated expertise across QMS, operations and compliance
- Engagement scope and responsibilities are agreed based on each client's needs

ASSESS → IMPLEMENT → TRAIN → AUDIT → IMPROVE

Integrated Operational Excellence Framework

ONE PARTNER ACROSS SYSTEMS, PEOPLE, PROCESS, EQUIPMENT AND BUSINESS PERFORMANCE

1. ASSESS

- Business / process diagnosis
- QMS / compliance gap assessment
- Loss, risk and maturity assessment

2. DESIGN

- Process architecture & controls
- KPIs / SQDCPM / dashboards
- System, SOP and standard-work design

3. IMPLEMENT

- Shop-floor deployment
- TPM / TQM / Lean / Core Tools
- Training, coaching and ownership

4. IMPROVE

- OEE / productivity / quality
- Cost, delivery and inventory
- RCA, Kaizen and waste elimination

5. AUDIT & SUSTAIN

- Internal / supplier / customer audits
- Certification & surveillance readiness
- Layered audits and management review

6. BUSINESS IMPACT

- PPM / FTR / COPQ
- Capacity / cycle time / OEE
- Customer satisfaction and sustainable results

Executive Impact Dashboard

MEASURABLE QUALITY & OPERATIONAL IMPROVEMENT

Selected outcomes from professional quality-improvement engagements and organizational experience.

~50%	~50%	~38%	~99%
Rejection & Rework Reduction	COPQ Reduction	Customer PPM Reduction	First-Time-Right Performance

MEASURE → ANALYSE → IMPROVE → CONTROL → VERIFY → SUSTAIN

Quality & Customer Impact

QUALITY AT SOURCE • CUSTOMER CONFIDENCE • RECURRENCE PREVENTION

Focus: customer complaints, 8D/CAPA, process capability, audit readiness and recurrence prevention.

Leadership Team – Integrated Expertise

BUSINESS EXCELLENCE • QMS & IATF • OPERATIONS & MANUFACTURING EXCELLENCE

S. Y. KULKARNI

Director

QMS & IATF Implementation

30+ Years Industrial Experience & 8+ Years QMS Consulting

- QMS & IATF 16949 implementation
- Supplier Quality, audits & development
- PPAP and customer audit readiness
- QMS coordination, training & corrective action
- Lean Six Sigma Green Belt – ASCB (E) Ltd.
- Internal Auditor training – ISO 9001:2015 & IATF 16949:2016
- QMS consulting, supplier audits, PPAP & customer audit support

System, certification, supplier and customer quality leadership

Y. PANCHWAGH

COO – Operations & Manufacturing Excellence

25+ Years Manufacturing & Plant Operations Experience

- Plant & Operations Management / PPC
- OEE, productivity, manpower & capacity
- TPM, Lean, Kaizen, 5S & Poka-Yoke
- Cost, cycle-time, NPD & shop-floor transformation
- Certified Internal Auditor – QMS & EMS, IATF 16949 & ISO 14001
- Certified 5S Auditor – 5S System Implementation
- Certified Trainer – Productivity Improvement Activities

Hands-on plant, production and manufacturing improvement leadership.

S. G. SUVARNKAR

Founder & Director –

Business & Operational Excellence

20+ Years Automotive & Manufacturing Quality Experience

- Business & Operational Excellence
- QMS / IATF implementation & audit readiness Customer / OEM quality & stakeholder management
- Lean Six Sigma, problem solving & measurable improvement
- Certified - Lean Six Sigma Green & Black Belt – AIQM, UK / IATF 16949 / QMS 9001 – IMS 9K / 14K / 45K
- Global 8D / Problem Solving
- Global Product Support & Quality Planning-Workshop – Switzerland & Germany

Business-facing transformation leadership from strategy to shop-floor execution.

Our Extended Expert Team

COMPLEMENTARY EXPERTISE • QMS • AUDITING • STATUTORY COMPLIANCE

Prabhakar S. (Auditing and Training Expertise)

- 19+ years of experience in the Automotive industry
- Expertise in Quality Management Systems (QMS)
- Strong experience in Quality Systems, Audits & Compliance
- Practical exposure to QMS implementation, internal audits & customer/certification audit readiness.

Mayur Pawar (Lead Auditor & Management Systems Consultant)

- Lead Auditor: ISO 9001, ISO 14001 and ISO 45001
- Internal Auditor: IATF 16949; Core Tools knowledge
- 300+ projects and 300+ third-party audits stated in profile
- 200+ internal auditor courses and 400+ awareness trainings stated in profile.

Sanjay Ramchandra Joshi (QMS Consultant & Management Systems Auditor)

- QMS Lead Auditor training – Indian Register of Shipping
- EMS Lead Auditor training – TÜV Rheinland
- ISO 45001:2018 Internal Auditor
- QMS consultancy proprietor since December 2013.

D S Jubre (System Implementation)

- B.E. Mechanical Engineer with 13+ years of rich experience in Quality Management Systems (QMS) and Quality Assurance (QA) within manufacturing industries.
- **Expertise:** Specializes in IATF 16949, ISO 9001 (Quality), ISO 14001 (Environment), and ISO 45001 (Safety) ; QMS Implementation & Certification: End-to-end system setup and certification support across major ISO/IATF standards
- Training & Development: Customized classroom and on-site training for employees, engineers, quality teams, and management.
- Documentation & PPAP
- Auditing & Audit Readiness:
- Quality Improvement & Problem Solving: Expertise, and Six Sigma fundamentals

Ajit Prabhune (Labour Law & HR Compliance Specialist)

- PF, ESI, PT, LWF and labour-law statutory compliance
- Factory licensing, contract labour registrations and renewals
- Payroll processing, statutory records, returns and audit coordination
- MPCB consent coordination and related compliance support

Nexaouraa Leadership Capability Coverage

ONE TEAM • COMPLEMENTARY EXPERTISE • END-TO-END IMPLEMENTATION

BUSINESS EXCELLENCE & CUSTOMER

- Business / operational excellence
- Customer & OEM interface
- Audit readiness & stakeholder management
- Performance improvement & KPI focus

QMS, IATF & SUPPLIER QUALITY

- ISO / IATF / IMS implementation
- Internal, supplier & customer audits
- PPAP, APQP and Core Tools
- CAPA, 8D and QMS coordination

PLANT OPERATIONS & PPC

- Production planning & control
- OEE, productivity & manpower
- Material, inventory & delivery planning
- Maintenance coordination & safety

MANUFACTURING EXCELLENCE

- Lean, TPM, Kaizen & 5S
- Poka-Yoke & process improvement
- Cycle-time / capacity improvement
- Cost reduction & waste elimination

NPD & PROBLEM SOLVING

- NPD, trials & production readiness
- RCA, CAPA & structured problem solving
- FMEA, SPC, MSA & process control
- Shop-floor training & capability building

END-TO-END ENGAGEMENT MODEL

ASSESS → BUILD → DEPLOY → IMPROVE → SUSTAIN

NEXAOURAA
INTEGRATED QUALITY SOLUTIONS
DRIVING PRECISION. DELIVERING EXCELLENCE.

| Leadership Profile

FOUNDER & DIRECTOR – BUSINESS & OPERATIONAL EXCELLENCE

20+ YEARS
Hands-on automotive & manufacturing experience

350+ TRAININGS CONDUCTED
Total reported training volume

QMS • IMS • IATF • CORE TOOLS
Implementation, auditing & capability development

PROFESSIONAL SUMMARY

Manufacturing and automotive quality professional with extensive experience in QMS / IMS, IATF 16949, Automotive Core Tools, supplier quality, Lean Manufacturing, Six Sigma and continual improvement.

Practical, industry-oriented approach: translating standards and technical concepts into shop-floor application through case studies, audit simulations, group exercises and manufacturing examples.

CORE EXPERTISE

- QMS / IMS implementation: ISO 9001, ISO 14001, ISO 45001
- IATF 16949, CSR and automotive quality systems
- APQP, PPAP, FMEA, MSA, SPC, Control Plans & Cp/Cpk
- Internal, supplier, process and customer audits
- 8D / G8D, RCA, CAPA, 5 Why and corrective action
- Lean, Six Sigma, Kaizen, 7 QC Tools and COPQ
- Supplier development, customer quality and shop-floor controls

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Lead Auditor – ISO 9001 (as stated in supplied profile)
- IATF 16949 Internal Auditor
- IMS Internal Auditor – ISO 9001, ISO 14001 & ISO 45001
- Lean Six Sigma Green Belt & Black Belt – ASCB, UK
- Global 8D / Problem Solving – OMNEX IMS
- Global Product Support & Quality Planning Workshop – Switzerland
- Engine Sealing & Specialty Technology Workshop – Germany

EDUCATION & TRAINING DELIVERY

- B.Tech. – Mechanical Engineering
- Diploma – Mechanical Engineering
- Executive PG Diploma in Management (EPGDM) – Symbiosis

Training for operators, technicians, inspectors, engineers, supervisors, internal auditors, process owners and managers; customized to organizational requirements and operational challenges.

Training, Industry Engagement & Improvement Impact

350+ TRAININGS • 150+ IMPLEMENTATIONS • 15 SUPPLIER PROJECTS

TRAINING AREAS

- QMS / ISO 9001 and Integrated Management Systems
- IATF 16949 implementation and awareness
- Internal Auditor Development & Audit Management
- Automotive Core Tools: APQP, PPAP, FMEA, MSA, SPC, Control Plans
- Lean Manufacturing, Kaizen and Operational Excellence
- Lean Six Sigma, 7 QC Tools, 8D and Root Cause Analysis
- GD&T, Metrology, CMM and Gauge Calibration
- Supplier Quality, Customer Quality and Audit Readiness
- EHS / Energy management, HIRA and employee engagement

TRAINING METHODOLOGY

- Instructor-led classroom training and corporate workshops
- Practical automotive and manufacturing examples
- Interactive case studies and group exercises
- Audit simulations and hands-on quality-tool application
- Root-cause analysis and corrective-action exercises
- Customized content aligned to customer requirements
- Practical interpretation of ISO and IATF requirements

Focus: learning that can be applied at the workplace.

SELECTED TRAINING CLIENT ORGANIZATIONS

Mahindra • Premium Transmission • ElringKlinger • Banco Products • Kranti Industries • Rieter India • Indo Schottle • Tenneco • John Deere • Bharat Forge • Konecranes • CIE Automotive • ARaymond • Suttati Group (Sumax Enterprises)

SELECTED IMPROVEMENT OUTCOMES

- Approximately 50% rejection / rework reduction
- Approximately 50% COPQ reduction
- Approximately 38% customer PPM reduction
- Approximately 30% CMM inspection cycle-time reduction
- 50+ Kaizen projects; 100% rework elimination in a critical project
- Reported 99% first-time-through performance and zero PPM in critical OEM programmes

TRAINING CLIENTS & EXPERIENCE SPAN AUTOMOTIVE, ENGINEERING AND MANUFACTURING ORGANIZATIONS

Outcomes are selected achievements reported in the supplied professional profile; results are engagement-specific.

Training Delivery Profile & Engagement Readiness

CORPORATE TRAINING • IMPLEMENTATION • SUPPLIER DEVELOPMENT

20+ YEARS
Automotive & manufacturing industry experience

350+
Trainings conducted – total reported count

150+
Implementations across QMS, EMS, OHSMS and supplier audit / development activities

15
Supplier projects involving training, audits and handholding

PARTICIPANT PROFILE

Shop-floor technicians • Operators • Quality inspectors • Engineers • Supervisors • Managers

Recommended classroom batch: 15–25 participants. Smaller groups are recommended for hands-on measurement, gauge handling and shop-floor practice.

AVAILABILITY & SCHEDULING

Available subject to mutual confirmation of dates, location and programme schedule. Minimum two weeks' prior information / notice is requested.

RECENT TRAINING REFERENCES – DETAILS TO CONFIRM

Nagpur, October: references include ISO 14001 / ISO 45001 internal auditing; ACMA – Lean, Safety and HIRA; IATF internal auditing and Automotive Core Tools.

Year, exact dates, host organization and final topic list to be confirmed before submission.

LOCATION, TRAVEL & LOGISTICS

Base location: Pune, Maharashtra, India.

Available to travel pan-India by flight. Local travel and accommodation to be arranged by the client or reimbursed at actuals.

Engagement planning: training scope, participant level, batch size, delivery mode, dates and logistics to be mutually agreed before confirmation.
